

Norwich Bulletin

and Courier

139 YEARS OLD

Subscription price: \$10 a week; \$50 a month; \$500 a year.

Entered at the Postoffice at Norwich, Conn., as second-class matter.

Telephone Calls: Bulletin Office 424, Bulletin Editorial Rooms 425-2, Bulletin Job Office 424-2.

Willamette Office, Room 5, Murray Building, Telephone 214.

Norwich, Saturday, Aug. 7, 1915.

The Circulation of The Bulletin

The Bulletin has the largest circulation of any paper in Eastern Connecticut and from three to four times larger than that of any in Norwich. It is delivered to over 3,000 of the 4,033 houses in Norwich, and read by ninety-three per cent. of the people. In Windham it is delivered to over 900 houses, in Putnam and Danielson to over 1,100 and in all of these places it is considered the local daily.

Eastern Connecticut has forty-nine towns, one hundred and sixty-five postoffice districts, and six rural free delivery routes. The Bulletin is sold in every town on all of the R. F. D. routes in Eastern Connecticut.

CIRCULATION

1901, average 4,412
1905, average 5,920
July 24, 1915, 9,050

HAVE THE BULLETIN FOLLOW YOU

Readers of The Bulletin leaving the city for vacation trips can have it follow them daily and thus keep in touch with the news of the day through The Bulletin business office.

GOD'S SOAVERS.

Now and then we come across a bit of extravagant scientific warning that is amusing. In his book upon "Flies in Relation to Disease," Mr. E. H. Hille, B. A., Ph. D., etc., says: "The fly, the proboscis is more successful in regarding the progress of civilization and the alleviation of human suffering than all the armaments of our most Christian powers! Thew! God made turkeys buzzards and flies and beetles to remove filth from the surface of the earth that the air should not be polluted and plagues ensue. Where the carcass is the buzzards gather, and the beetles congregate, and where filth is there also the fly scavenger is a protector of the health of man, and there are billions of them and they work in the wilds as well as elsewhere.

Boston made war on filth in certain neighborhoods and made an end of the fly nuisance. They removed the cause.

If we were as much afraid of filth as we are becoming of flies a great many preventable diseases would disappear. The fly is just as guilty of poisoning man as the bacteria. Isn't it time we got at the primary cause of our troubles along these lines?

DRAWN FROM INDUSTRY.

The exigencies of the present war have made it necessary to draw from the ranks of industry 14,000,000 men of toil who knew nothing of military training in time of peace, and who can imagine what a tax this is upon the output of industry in the battling countries.

We are informed from time to time that great industries in Germany, England and France are paying 20 per cent. dividends and the inference is that business of all kinds is booming in these countries, but a revelation like this leaves not a doubt that business is badly hampered in all the 11 nations now engaged in strife.

This 14,000,000 men represent about one-sixth of the industrial force of the United States, and at an average of one dollar a day reduces the earning capacity of the masses \$4,000,000 a week. Instead of being able to increase the wealth of the nations they are busy destroying it.

Business booming abroad! The only business that is booming is the destruction of property and the butchery of men.

THE TOKEN OF EFFICIENCY.

Under present labor systems the skilled mechanic is becoming scarcer and scarcer and as a result organized companies have to resort to some method to hold their best help in idle times so that they may be sure of them when their services are needed.

No one ever expected skilled labor would see a day when it would be handed a retainer, as lawyers are, to hold them true to service. Large concerns in this country are paying a dollar a day and more to skilled idle workmen that they may be sure of their services when needed. Among these is the great Remington company.

The wage-paid waiting list is modern, and is business like and necessary. A few surplus hands are held in this way with a view of always keeping the supply equal to the demand.

These are times when business methods have to be on broad-gauged lines in order to ensure success. The close-fisted methods of the long ago in these days spell failure most every time.

Secretary McAdoo is booming; the government purchase of German ships again. Hasn't notice been given that they will be seized by the allies and confiscated if caught on the seas during the war under any flag?

The negro who followed Becker in the electric chair left a better impression behind.

DEFENSE THE ONE ISSUE.

The annual meeting of the governors of the states is becoming as regular as the meetings of mayors and the conferences of churches. The next meeting is to be held in Boston and the subject to be considered is need of immediate national defense.

The questions of great guns, first-class submarines, up-to-date aircraft and well-trained and efficient citizenship are enough to command the sincere and immediate attention of the ablest men in the country. The nation's unpreparedness at present is simply appalling.

This great government has installed four 14-inch guns, three on the coast of southern California and one for the defense of the Panama canal. These guns are needed at all points of defense along the coast on both sides of the continent.

Boston is a good place for the meeting. A Michigan paper alluding to this important meeting says: "It is splendidly significant that this conference of governors is going to be devoted to this subject of defense. It shows that Uncle Sam has been provided wide awake."

Let's be glad too, that the governors are going to meet in Boston. Boston is near Lexington and Concord and the graves of the minute men. Boston knew Americans unafraid—Americans who trusted in God and kept their powder dry.

AN OPEN DOOR FOR ALL.

The United States bureau of education calls attention to the fact that the opportunities for learning were never so many or easy of gaining as now. Besides the colleges, universities and normal schools, libraries, museums and art galleries, there is no end to the organized societies designed to give everybody a chance.

The federal government itself is realizing, as never before, the desirability of a wide distribution of the scientific information it has collected at large expense of time and money, and many of the bulletins and circulars issued by the government are now affecting directly the everyday procedure of education. The Boys and Girls club work in the department of agriculture and the circular letter service of the bureau of education illustrate two different types of the information service of the federal government, both of recent development.

In the two years ending June 30, 1914, the bureau of education issued 112 numbers of its Bulletin, representing about a million separate copies and covering nearly every phase of educational endeavor for the direct use of school officials.

A host of other organizations making no claim to a place in the formal school system are nevertheless doing active work of a directly educational nature. The Boy Scouts, the Girl Scouts, the Camp Fire Girls, women's clubs, parent-teachers' associations, musical societies, art centers, etc., are doing a work whose educational importance is only beginning to be apprehended.

The influence of the fraternal organizations is directly educational. In the two years ending June 30, 1914, the bureau of education issued 112 numbers of its Bulletin, representing about a million separate copies and covering nearly every phase of educational endeavor for the direct use of school officials.

Satan never claims the Lord is on his side. His emissaries often beat the devil at that.

The Kaiser has what is left of Warsaw. It may be a joy, and very likely a burden, too.

The motion pictures passed by the censors show that there is something elusive about good taste.

There is no use of calling this a cold, backward summer, for it is a souse, shivering tramp.

If the war in Europe, as Jane Adams says, is an old man's war, there is nothing very feeble about it.

The patched-trousers brigade must be thrilled with a feeling of anxiety at the prospect of shorter coats!

We should admire William Jennings Bryan's wonderful spirit if it was not garbed in flimsy conceit.

Now they are trying to make out that a twilight baby will never become a sunrise success. Mercy me!

Every day in these times must lend assurance to the fellow who so often says: "The fools are not all dead yet!"

The Man on the Corner says it is a steady job like the traffic policeman's, but he can't get into the lime-light.

Stock in an ammunition factory that pays 20 per cent. makes a man think war is a blessing when it is only a blight.

If an American is a glorified Englishman, what will Henry James be when he becomes an Englishman by adoption?

In the game of war the Russian generals do not get checkmated. The Kaiser has no doubt they understand the game.

Every generation shows its genius in new expressions. Those who used to be called loafers are now spoken of as efficiency experts.

Missouri needs snare with pride because she has a donkey that chews tobacco. Connecticut would not think of speaking of just one.

Who can blame a supercilious naught that has a firing zone four miles greater than ours for thinking the American navy is a joke?

It takes a brave and devout woman to lend five sons for the defense of her country and to feel thankful for the return of one legless patriot.

THE MAN WHO TALKS

It is worse to be born-anxious than to be born with a hair-split. It is a sore spot not easily surmountable and, an affliction of the mind, it is usually invoked. Envy sets its roots in weakness and blossoms into misery; a neighborhood success makes one afflicted with it; it grows with the years, and for to be without envy is to be great. Envy increases its power of subsistence in periods of adversity. Those who are only a little envious can hide their own guilt, but those who are grievously envious disclose their own consciousness of inferiority, and expose their guilt to all. If they only knew the things they envy us of, they would laugh at their own folly. What we don't know seems to increase our discomfort. Envy is capable of giving one a forsaken hell on earth. It inspires one with meanness and, like the scorpion, has the power to sting itself to death.

When I read from Cicero: "There is not a moment without some duty," I feel thankful I do not feel the pressure of it. It is the burden of the conscious of the urge of life. The man who resents the pressure. Some people think it to be a fine manifestation of piety to leave their duties to others. I have seen many of the fact that they who dodge duties are liable to avoid gains. Many people seem to be confused concerning the duties of life, because they are so numerous; but those who simply think it is their duty to do right go rambling right along in the full enjoyment of life. They pay to so strain our eyes looking for duties to perform that we get a strange view of life, or spiritual junkies concerning the duties of life. Doing right keeps us in the straight path, and duties just blossom along with the virtues of life, or spiritual junkies. George Eliot tells us the reward of each duty done is the power to do another."

Some people think they are saved by grace, some by faith, and some by works, and they give no thought to a life of service to others. It is among their fellowmen. How many ever think they may be saved some, but not much. The safe idea may have narrow margins, but it is a safe one. There is nothing definite about being saved any more than about being good, or strong, or rich—it is possible to be better, or stronger, or richer, but not what we seem to be, but what we are that tells. The man who "does not intend to do much business this week, but next week intends to make his money" defers where others accomplish. What makes for salvation is responsive activity to good thoughts now, not next week. Sensitive people depend upon thinking good thoughts, when doing good deeds is what counts. Some men who join the church never get far enough into the spirit of the church to see whether they are associating with the goats or the sheep.

I wonder how a person can become too intellectual to be intelligent? Perhaps over estimating mentality, codding pride and hitching both to oneself is what makes the intellectual people appear weak and silly. If conceit and learning did not mix any better than oil and water it would be impossible for the intellectual to succeed in making money of themselves. A little learning is not as dangerous as an over supply of knowledge. It is not a matter of much difference whether it is the pride which lends haughtiness to the soul, or prompts one to ape humility, but the latter is a more dangerous force for a fall, anyway. The intelligence that is all wool and a yard wide and takes on indelible color has no vanity in its way or woe.

When a man of 70 says he feels as young as he ever did he may believe himself, but no one else believes him. It is not his age that counts, but his attitude. He does not remember how young he felt in the long ago, which makes a man believe in his own youthfulness. Life is spent for more than half the world before they are 40; and to see the current of life running by in a not far beyond three score and ten is wonderful; if we are in the habit of regarding it as being common-place, it will be true as the old saying is, "Older than he feels, but the world presumes to judge his age by his looks, and he usually looks it. Age makes the head heavy and the heart heavy; and it is fortunate that the evening of a well-spent life brings its lamps with it." Gray hairs should be respected by none, but by those who have been silvered by time. He is indeed fortunate whose foolishness and wisdom seem well balanced at 70.

A bright paragrapher writes: "I've had the best husband in the world—at that time." Since she had the only how could a comparison be made. How it is possible for a man to be better or worse if there is no one else to compare him to. Since Adam was not sharp at the time he was created, or shrewd enough to keep a contract and preserve his own domain, it is not in evidence that he was so wise as he is now. The old man's wife for his errors he falls consistently short of the manhood which commands respect today. Adam left no record of his getting old, and it is difficult for the writer to learn much about him, since our knowledge of the early ages is all traditional. The record of Adam is a blank page, and from being satisfactory, and our inheritance from him does not indicate that there was any best lived in his day.

A man usually gets the best glimpse of his own folly when he ventures to build a house for his family according to his own plans. The average man knows just about as much about planning a convenient house as he does about constructing a Latin dictionary. When Mark Twain built his house with the kitchen where the attic usually was located, the world was amazed, although it recognized that it is better to be below the odors of the kitchen than above them. The primitive house was all kitchen and smoke, and the parlor was in the front yard. Man's original idea of a house has increased from a box to a wonderful arrangement of many boxes. The kitchen has been lifted at every corner, and is now believed to be properly located. The first represents the pleasant and airy room in the house. Man as a builder is always a little bit of a fool, but he is a better one than he is when he is out of smoke and misery. It has taken him ages to recognize that out of door life is the true energizing life.

If honesty is the best policy the demand for sincerity is always far in excess of the supply. I am not as inclined to attribute this to original sin as to present duplicity. There was a time when men must have maintained a higher average for honesty of purpose than they do today. The first family erred in wanting to know too much—it would eat of the fruit of the tree of knowledge; but the men of earth have gone to the other extreme and seem to delight in knowing too little. Instead of recognizing the practical worth of the Golden Rule and doing as they would be done by, they prefer to do as they have a mind to. Here in the 20th century we witness millions of armed men representing a score of nations engaged in killing

KEEPING COOL IN SUMMER

(Written Specially for The Bulletin.) It is a strange and unaccountable fact that mankind never seems to get accustomed to the condition that summer is the hot season. Birds and animals know better than humans appear to that the torrid time is approaching. In proper season the birds begin to moult, horses, dogs and other creatures of their sort start in to grow a thinner skin. As the summer season arrives they are, in a measure, prepared for its advent.

Not so with the majority of men. As winter comes they lay in a supply of coal, put up storm windows, apply weather strips to draughty windows and doors, make the house snug and comfortable, and then, when the summer comes, they find themselves in a state of unpreparedness. They will also buy clothing and make fur, mitts, ear-muffs and what not.

Light summer draperies and rugs and upholstery will be required each of the warmer, more cozy, more substantial winter fittings. Then, when the mercury gets into the red, they find themselves unprepared, unless, of course, those who are in no condition to make preparations anyway.

But how differently do men and women act in advance of summer! The oldest inhabitant will exclaim with wonder and surprise, in case the mercury marks 80 degrees or over, early in June.

Hot days and uncomfortable days have been coming just like this, each season during his 77 or 97 years, as the case may be.

He can recall the time when he was a boy, and he can recall the time when he was a man, and he can recall the time when he was a woman, and he can recall the time when he was a child, and he can recall the time when he was a baby, and he can recall the time when he was a fetus, and he can recall the time when he was a zygote, and he can recall the time when he was a sperm, and he can recall the time when he was an egg, and he can recall the time when he was a cell, and he can recall the time when he was a molecule, and he can recall the time when he was an atom, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a graviton, and he can recall the time when he was a neutrino, and he can recall the time when he was a quark, and he can recall the time when he was a lepton, and he can recall the time when he was a photon, and he can recall the time when he was a gluon, and he can recall the time when he was a
